*Active stable pig

Active stables for pigs stand for more animal welfare, transparency and short transport routes from the farmer, through the slaughterhouse to processing. It offers the pigs different straw and slatted floor areas that they can choose freely. In addition to a feeding area on slatted floors and rooting areas with straw, the animals also have access to bright stable areas with showers and toys, darker rest areas and outdoor climate areas with north, south, east and west terraces. The active stable offers a lot of freedom of movement over 1000 m² and opportunities for activities (moving, rooting, showering, playing, bathing, resting, wallowing) with twice as much space.
